

PATIENT CASE STUDY: TREATMENT VARIABILITY IN N2 POSITIVE STAGE III NSCLC

Daniel Krejčí

Department of Pneumology, 3rd Medical Faculty Charles University in Prague and NNB, Prague, Czech Republic

Purpose: There are several possible approaches to the treatment of stage III non-small cell lung cancer and it is a point of great debate especially in patients with N2 positive lymph nodes. In this short case report, I would like to present such a case and support the discussion about it.
